

Industrial Effluent

**Tulips Foods,
Ebenezer, Cornwall**

Project: Replacement of existing DAF and installation of a full biological treatment plant to accept flows of 250m3 per day.

Client: Tulips Foods

Tulip Foods make Pork and Bacon products

The site had an existing Dissolved Air Flotation (DAF) system providing solids removal in poor condition and too small. The project involved replacement of the existing DAF and installation of full biological treatment to accept flows of 250m3 per day.

H2OK awarded project as Principal Contractor with Nijhuis Water Technology as process partner

H2OK have worked for Tulip for over 10 years including the following projects:

- **Tulip Newtons Margate:** Biological Treatment Plant
- **Tulip Pool:** Replacement Dissolved Air Flotation System
- **Tulip Kings Lynn:** Replacement Dissolved Air Flotation System
- **Tulip Bugle:** Full Biological Treatment Plant
- **Tulip Bodmin:** Fat Recovery Plant being commissioned now
- **Tulip Bodmin:** Effluent Recycling Trial underway.
