

H2OK[®]

Leisure & Holiday Park Services

Sewage & Waste Water Solutions

H2OK provide a unique turn key service in all matters relating to waste water & sewage disposal. Our experience with the holiday and home park industry, from the smallest touring parks to the largest mixed parks, allows us to recommend the most suitable cost effective solution for any situation.

Our dedicated team covers the UK and provides an individual service to suit the client's needs from a pre-purchase inspection to a full design, supply, installation and maintenance package.

Our other principle services include:

- Sewage Treatment Solutions
- Pumping Stations to adoptable & non-adoptable standard
- Installation of Environmental Equipment
- Design & Construct Package for Park Infrastructure
- Site & Drainage Design
- Flood Risk Assessments
- Environment Agency & Water Company Negotiations
- Waste Water Management
- Structural Surveys & Structural Design
- Grease Control
- Odour Control

A treatment plant for my new lodge development was designed, supplied, installed and is now maintained by H2OK. I have been delighted with the service, which was efficient, friendly and on budget.

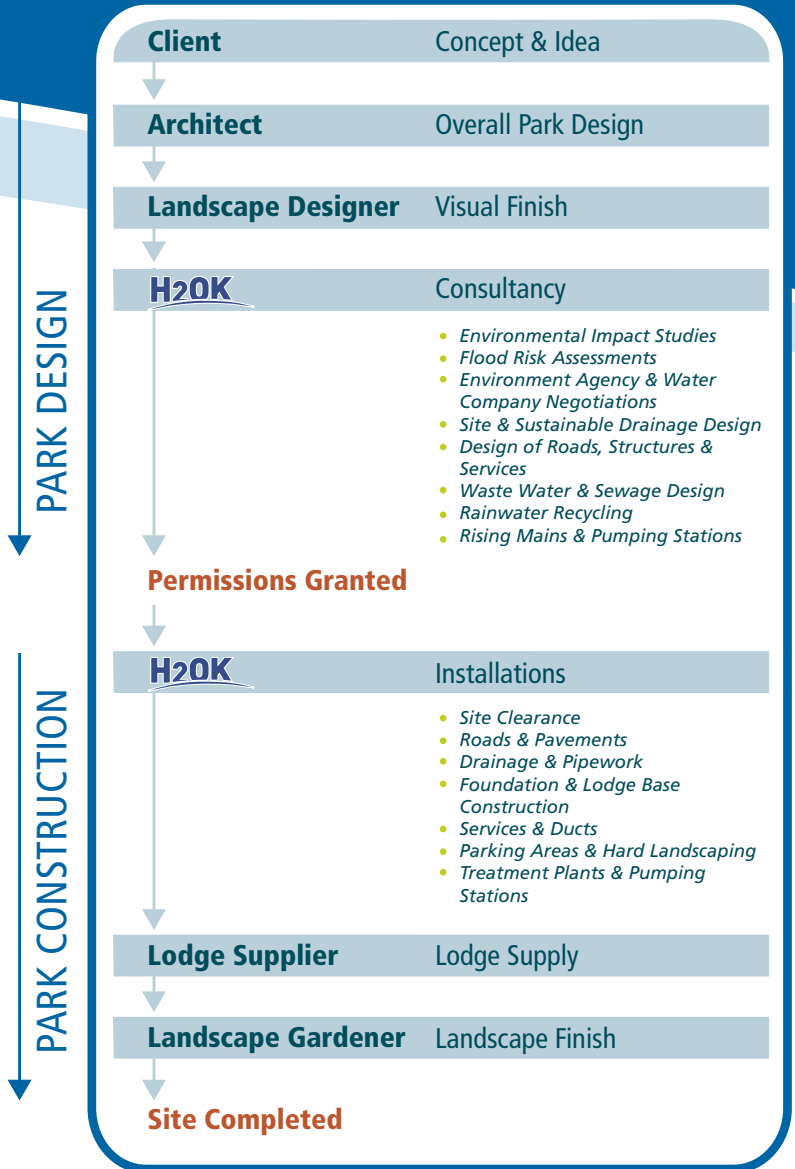

Keith Horsfall
BH&HPA member and owner of The Valley

Park Development

As members of the BH&HPA our specialist parks team are committed to providing the Leisure & Parks Industry with a unique infrastructure design & construct service.

H2OK's multi-disciplined approach provides a fully skilled workforce from Chartered Engineers to Civil Contractors. Working closely with other park professionals H2OK are an essential part of any park development team.

Working with my other advisors H2OK found workable solutions and made my development possible. H2OK provided me with a full infrastructure design package. I have no hesitation in recommending this company.

John Hick

Vice President of the BH&HPA & owner of Pendra Loweth, Maen Valley

I used H2OK to design, supply and install a treatment plant, lodge bases, roads, paving and other services. I cannot recommend this company highly enough.

Brian Helps

Project Manager, Trenythor Manor Hotel & Spa

Pre-purchase Inspections

H2OK offer a pre-purchase inspection service of a park's existing waste water & sewerage infrastructure. We can report on the current condition of the treatment plants, pumping stations and supporting infrastructure, at the same time giving an indication of life expectancy, refurbishment or replacement costs.

H2OK can also advise on the suitability of the existing infrastructure and equipment to cope with any proposed park development or expansion.

A note from Phil Badger, Managing Director

"Every month our engineers at H2OK prepare survey reports on numerous treatment plants, pumping stations and other environmental equipment on properties where a purchase has already taken place. Many of these properties are holiday & leisure parks.

In too many cases our inspection identifies problems with the existing infrastructure and equipment. An H2OK pre-purchase inspection would have identified the problems, allowing the purchasers to renegotiate the purchase price saving both money and distress and, of course, possible fines and prosecution by the Environment Agency for discharging effluent that is failing to reach the required consent standard.

If you are considering the purchase of a park I really do recommend that you take advantage of this service. It might save you a great deal of money".

"H2OK providing 21st century environmental solutions to the Holiday & Home Park Industry throughout the UK"
